ANNEXURE-A

Storage Tank
12'x12'x11'
8075 US Gallons
# ANNEXURE-B

## EARTHWORK

(i) Excavation for foundation, footing of columns, retaining walls, plinth beams etc. in all kinds of soil including layout of building and maintaining suitable control points, backfilling with suitable soil, compaction up to 95% dry density, watering, leveling, dressing and disposal of surplus material outside the project limits in accordance with the local authorities requirements, complete in all respects as per drawings, specifications and to the approval of the Engineer.

(ii) Excavator Excavation up to any depth up to ——— or as shown on drawings.

(iii) Backfill with selected granular material received from excavation around foundations and footings up to ——— or as shown on drawing.

(iv) Disposal of Surplus Excavated Soil from site

## FILLING, COMPACTION AND TESTING

(i) Supplying and filling with suitable soil in layers not exceeding 8" in thickness in depressions, around retaining walls, under floors, footing of columns, etc. with selected granular material having minimum value of CBR 6 and maximum Plasticity Index of size (6) as determined by AASHTO T89 and T90, leveling, dressing, watering and compacting up to 95% modified AASHTO dry density and disposal of surplus excavated materials outside or within the premises, complete in all respects as per drawings, specifications and to the approval of the Engineer and Local Authority’s requirements complete in all respects as per specifications and to approval of the Engineer.

(ii) Compaction

(iii) 70% local sand and 30% gravel or Brick balest

## TERMITE CONTROL

(i) Providing and applying Anti termite by using “FIPROKILL”, “Salyer 25SC”, “MIRAJ 5% SC by Ali Akbar”, or approved equivalent termite proofing chemical, mixed with water in ratio as per manufacturers specifications, at the bottom at site of columns foundations, trenches before laying of PCC 1:4:8. The Contractor Will be Required To Furnished 10- Years Grantee Of the Termite Proofing Works.

## PVC Water Stopper

(i) Supply, install and laying best quality 9" wide PVC water stopper for concrete walls with two layers of water stopper as shown on drawings, specifications and approval of the Engineer.

(ii) In retaining wall /Tanks Inner Wall | Rft 79 |

## Paint Work

Inner Side & Outer Sides | Sft 466 |

## Manhole Covers

(i) Supply, fabricate and install stainless steel sheeted man hole covers with frame conforming to ANSI Type 304, satin finished fabricated from 16 SWG sheet and 8 SWG frame including fittings and fixing accessories complete as shown on drawings, specifications and approval of the Engineer.

(ii) 24"x24" Internal dia Manhole Covers for Water Tanks (If Required) | No. 1 |

## Monkey Ledgers

(i) Supply, fabricate and install in position M.S steel monkey ledger with frame conforming to satin finished fabricated from 16 SWG pipe and 14 SWG frame including fittings and fixing accessories complete as shown on drawings, specifications and approval of the Engineer.

(ii) Providing, laying, cutting, jointing, testing and disinfecting UPVC / HDPE pipes line in trenches, with socket joints, complete in all respects.

## Silica Sand

(i) Providing and fixing 3 to 6mm thick M.S sheet with supporting angles and rods including fixing accessories complete in all respect.

(ii) 316 S.S Mesh (1"x7") | Kgs 20 |

## Total Collection

-
### INNER SIDE ChipSing

(i) Terrazzo is a composite material, poured in place or precast, which is used for floor and wall treatments. It consists of chips or other suitable material, poured with a cementitious binder (for chemical binding), polymeric (for physical binding), or a combination of both, in accordance with the specifications and to the approval of the Engineer.

(ii) Ratio (1:2) - 723 -
