PART I – TERMS OF REFERENCE

Consultancy to assess the national Measurement-Reporting-Verification (MRV) system for GHG inventories and mitigation and design an MRV system for the Industry and Trade enterprises not subject to Decision No. 13/2024/QĐ-TTg (focusing on the Textile & Apparel and Food & Beverages subsectors)

(Tender ref. FY26-0208)

1. Background

WWF was one of the first International non-government organizations working in Vietnam. In 1985, WWF began working on a national conservation strategy and since then has worked closely with the Vietnamese Government on a diverse range of environmental issues and implemented field activities across the country. WWF-Vietnam is part of WWF-Greater Mekong which operates in 5 countries: Laos, Thailand, Myanmar, Cambodia and Vietnam. Find out more at <http://vietnam.panda.org/>

Under Project (Vietnam Sustainable Industries), WWF-Viet Nam works with business and government to decarbonize the light industrial sector. The project will support 300 targeted facilities in the 02 target sectors: the Textile & Apparel (T&A) and Food & Beverage (F&B) to apply decarbonization solutions such as the electrification of energy intensive processes and introducing energy efficient technologies to reduce CO₂e emissions. Furthermore, the project will develop sectoral decarbonisation roadmaps, strengthen existing platforms to disseminate best practices and mobilise diverse actors to drive decarbonisation across the target sectors.

To contribute to Vietnam's Net Zero targets and strengthen sectoral decarbonization efforts, WWF-Viet Nam will collaborate with a consultancy firm or a consultant team to assess the existing national mitigation Measurement, Reporting and Verification (MRV) system for monitoring enterprises' GHG inventory and mitigation efforts in the Industry and Trade sector and design a dedicated MRV system for enterprises in the Textile & Apparel and Food & Beverages subsectors that are not subject to Decision No. 13/2024/QĐ-TTg. The findings and the proposed MRV system will not only support monitoring the project's desired outputs, inform the development of WWF-Viet Nam's Project Proposal to the Mitigation Action Facility, but also complement the existing MRV system, creating a more comprehensive dataset for two target T&A and F&B sectors, thereby strengthening Viet Nam's NDC commitments.

2. Objectives of the consultancy
