Solar Skills for Cambodia: Building Capacity, Driving Change

LIGHTING UP A SOLAR FUTURE

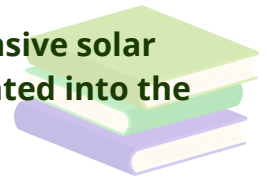

Cambodia has ambitious plans to expand renewable energy, particularly solar, to power a resilient economy and healthy planet. To achieve a fast, green and fair energy transition, the country needs more technicians with the right skills. Yet, quality training opportunities in Cambodia remain limited and underfunded.

This project will help **unlock Cambodia's solar potential by laying the groundwork for a strong solar workforce**. Designing a world-class curriculum and training teachers at local institutes, we are providing the skills needed to energize Cambodia's solar sector with long-term capacity.

WHAT WE'RE DOING

Build a comprehensive solar curriculum translated into the Khmer language.

Develop solar courses and teaching capacity at two training institutions.

Adapt curriculum for use in rural communities among non-technicians.

OBJECTIVE

Cambodia will have the foundation to deliver a solar technician training programme, contributing to widespread adoption of solar technologies across the country.

TRAINING INSTITUTES

**Don Bosco
Cambodia**

**National Technical
Training Institute**

Providing two pilot courses and high-quality equipment, this project is training 40+ solar technology teachers at two institutes to educate the next generation of solar installers.

IMPLEMENTING PARTNERS

WWF

Solaire Sans Frontieres

Don Bosco

Technical solar experts at Solaire Sans Frontieres, Don Bosco and WWF – the project’s leading implementor – will collaborate to design a global solar curriculum that can be adapted worldwide.
