

Climate Action Training for textile suppliers in Vietnam – DAY 3

Date: 29th - 31st October 2018

Location: HoChiMinh City

Conducted by:

Network Germany

Network Viet Nam

accompanied by:

supported by:

Federal Ministry
for Economic Cooperation
and Development

Agenda Day 3 – Financing and next steps

9:00 - 10:15	Wrap-Up and examples from factories
10:15 – 10:30	Coffee Break
10:30 – 11:15	Financing
11:15 – 12:15	Next steps for factories
12:15 – 13:00	Lunch
13:00 – 13:45	Next steps for brands

Meeting Higg-FEM requirements by setting-up a GHG-accounting

The Higg-Facility Environment Module (FEM V3.0) of the Sustainable Apparel Coalition (SAC) includes a section 'Energy Use & GHG'

By **setting-up a GHG inventory**, several **requirements of Higg FEM** can be met:

Level	Requirement	Fullfilled ?
1	Disclosing (all) sources of energy for the facility	YES
2	Disclosing baseline for energy use	YES
	Identifying processes or operations that use the most energy	PARTLY
	Setting targets for improving energy use / GHG emissions	PARTLY
	Establishing an implementation plan to improve energy use / GHG emissions	PARTLY
	Demonstrate improvement compared to baseline	NO
3	Calculating GHG emissions Scope 3	PARTLY

Activity

Discuss with your neighbor what would be suitable next steps in your factory for climate action.

- What could be a good start (GHG-inventory, identification of improvement areas ...)?
- What steps must be taken? What would be suitable measures?
- Who needs to be involved?
- What could be done already this week?

Discussion

Next steps

In order to support your factory in taking first steps for establishing a GHG-management successfully:

- You have received a template with guidance for identifying areas for improvements in the factory (“Energy Saving Walk-Around”)
- we offer a hotline for consulting at 2 days (4 and 13 December) for any question that have come up in the meanwhile when taking first steps

As an experience from many workshops, it is recommended to take steps shortly after the training when the learnings are quite fresh.

Please note, your brand may have specific programs or requirements on GHG management and -reductions.
